## Book Reviews

The film industry has launched very successful Mafia Wars and Action-Filled adaptations in the past. Destruction has showcased a very unique concept of plot and characters that will want the readers to form a series of dramas along the story.

This is the first novel that we have reviewed where there were historical facts that are somehow connected to the whole twist. True enough, the author researched carefully to the point that it is very timely and relevant.

We are recommending a detailed screenplay and we have recommended a company to your publisher that will do the screenplay for the book. They are the only ones who can create a worthy script for this very intricate book.

Overall, we are rating your book a **"5 STAR"** in this category. I hope this is a series concept since it summons and suggests it.
